

Earth Heritage Champions Project— **Linton Quarry**

We need you to be part of a new exciting geoconservation project that has started within your area.

You would have the following responsibilities:

- Monitoring the site; Linton Quarry
- Following monitoring, keeping the site in a good condition, this would be vegetation clearance, litter picking etc
- Promoting the site: this could be encouraging walks, or even bbq's maybe getting the local school to use it to teach the children, essentially getting the site used.
- Attending quarterly meetings with the site support group to discuss potential uses of the site and report any conservation issues, landslips etc.
- Following the guidelines of the Champions agreement, for example, if the agreement is that prior to any vegetation clearance the landowner is contacted, then this should be carried out.

If you would like to be a geological Champion then please contact *Jessica Donaldson* on j.donaldson@worc.ac.uk or 01905 542014
